PART II
SECTION B

END OF YEAR DATA 1966 - 67

INTRODUCTION

The following pages present important statistics regarding enrollment and financial data for school districts in the Commonwealth of Massachusetts.

End-of-year enrollment data indicate for each school district the average daily attendance (ADA), average daily membership (ADM), and net average membership (NAM) for pupils enrolled in regular day programs, special education, and independent vocational schools.

Financial data, first presented in tabular form, provide alphabetical listings by community of revenues directed to education from local, state, and federal sources; and analyses of the application of these funds in relation to various population and valuation bases.

To obtain an understanding of the sources of these funds and their application or expenditure for the Commonwealth and for individual communities, Source and Application Statements are presented in the Appendix for the State as a whole and for the individual communities.

It is anticipated that the tabular presentations in TABLES I through VI will give an opportunity for comparison between communities as rankings are reported. It is hoped that the source and application statements will provide a basis for a summary analysis of revenues and expenditures for each community.

Information used to create these statements was reported through the End-of-Year Financial and Statistical Report to the Division of Research and Development of the Department of Education by each municipal school district, regionally operated school district, and public school operated by a Board of Trustees.

PART II
SECTION A

FALL DATA 1966–67

In order that more timely dissemination of information may be achieved, this year the annual report of statistical data has been divided into two parts. Section A contains fall data on pupil and staff as reported October 1, 1966. This information was obtained from the fall returns of the cities, towns, and regions and the professional staff survey of the New England Educational Assessment Project (NEEAP).

Cities and towns are listed alphabetically and followed by regional school districts. Grade organizations are indicated as elementary, junior high, and senior high and have been updated by a review of enrollments within their areas. If no grade organization is shown, it implies that city or town does not operate its own schools and is either a member of a region or tuitions-out its pupils.

The School Attending Child was established by the Acts of 1966, Chapter 14, and is defined as a minor child whose parents or guardians are residents of the community and who is attending any school, any where, grades K – 12, inclusive.

ANNUAL REPORT

DEPARTMENT OF EDUCATION

INTRODUCTION

Enclosed are basic data for the fiscal year 1967-68 regarding education in the Commonwealth of Massachusetts. These data describe significant characteristics of the professional staffs, pupils, and finance pertaining to education.

Included also is information concerning appropriate valuations, School Committee appropriations, tax rates, and a list of expenditures by individual programs.

It is intended that this information will provide data profiles for analysis of characteristics of education in each school district in Massachusetts.

This information has been prepared by the Division of Research and Development and is part of the Department's mandated responsibilities.
